ATTENZIONE CAUTION ADVERTENCIA WARNING - In caso di dubbio nell'installazione consultare un elettricista. - Scollegare la rete di alimentazione generale. - Installare l'apparecchio solo all'interno, in luogo asciutto. - Non coprire la lampada con nessun oggetto: le temperature che potrebbero svilupparsi potrebbero essere causa d'incendio. - Non superare la potenza delle lampadine indicata sull'apparecchio. - Per la vostra sicurezza non modificare l'apparecchio. - Decliniamo ogni responsabilità per danni causati da un non corretto rispetto di queste istruzioni. - Usare solo lampade conformi CEI 34-92 2001 (cod-ILCOS). n.b. Alla prima fase di installazione o di sostituzione le lampadine fluorescenti devono essere portate a regime tenendole accese al 100% del flusso/potenza per almeno 100 ore al fine di ottenere valori stabili di funzionamento. - per la pulizia delle parti in acciaio e vetro si consiglia l'uso di un panno in cotone umido (non di lana); sono da evitare assolutamente prodotti contenenti solventi e/o alcool. - If you were in doubt during the installation, contact an electrician. - Disconnect the mains power switch. - Install the unit only indoors, in a dry place. - Does not cover it with any object: the temperatures that might develop may cause fire. - Do not exceed the maximum wattage of the bulbs indicated on the appliance. - For your safety do not modify the unit. - Disclaim any liability for damage caused by improper to follow these instructions. - Use only the lamp in accordance with CEI 34-92 2001 (code-ILCOS). NB during installation or replacement of the lamps fluo must be brought to the holding accessed in the system to 100% of the flow/power for at least 100 hours in order to obtain values of stable operation. - Or the cleaning of steel and glass, we recommend using a cotton cloth slightly moistened (not wool); are avoid products containing solvents and / or alcohol.

istruzioni per il montaggio

- 1) fissare a soffitto la staffa di fissaggio "A" con 3 tasselli a pressione (non forniti).
- 2) collegare i conduttori dal soffitto al morsetto "C" sulla struttura "A", rispettando le polarità indicate.
- 3) fissare la struttura disco "D" alla staffa "A" bloccandolo avvitando la ghiera "F" e poi le viti "G".
- 4) installare la lampada "G".

montaggio perline come da foto

- 5) installare le file di perline in vetro "F" come mostrato in figura "K" sulla struttura "D".
- 6) posizionare le estremità di ogni catena come indicato in figura "K" in due asole perfettamente opposte (iniziando dalle due indicate con un forellino) accorciando di una perlina per ogni catena installata (figura "M"), continuare l'operazione come mostrato nel disegno a lato della pagina, fino a montare tutte le catene nelle asole.

nota: il risultato del modello in foto è solo una delle possibili geometrie realizzabili.

assembly instructions

- 1) fit "A" fixing bracket to ceiling with 3 fasteners (not included).
- 2) connect electrical wires from ceiling to "C" terminal block on "A" bracket, respecting the indicated connection polarities.
- 3) fix the "D" frame on "A" frame with "F" ring nut and screwing "G" screws.
- 4) place "L" light bulb.

installing bead like picture

- 5) place "F" bead chains on "D" frame (see "K" image.)
- 6) place the end of ewery bead chains (see "K" image) in two holes that are perfectly opposit (starting from the two indicated by a small hole) and continue to plae it, shortening the chains of a bead at each installation (see "M" image) following the draw on late of page, until place all chains in the holes.
